This is an inspiring club where children can enjoy the freedom of the outdoors whilst under the relaxed supervision of an adult.

Children have the opportunity to embrace the environment by making camps with natural materials, use their skills to whittle wood, create safe pastures by building fences, make mysterious faces amongst the trees and stones, attempt fishing, track animals and discover our native birds and wildlife.

Each summer, a fantastic family feast and sleepover is held within the farm with stories around the camp fire...

Little Mares Clubs offer activities within a farm-based environment. The aim is for children to gain knowledge and confidence to enjoy the outside and the animals that live there. We also actively encourage families to come together to enjoy the surroundings of our natural environment.
